THE PATENT OFFICE

PATENTS AND DESIGNS

Calcutta, the 27th September 1997

ADDRESS AND JURISDICTION OF THE OFFICES OF THE PATENT OFFICE

The Patent Office has its Head Office at Calcutta and Branch Offices at Bombay, Delhi and Madras having territorial Jurisdiction on a Zonal basis as shown below :—

Patent Office Branch,
Todi Estates, IIIrd Floor,
Lower Parel (West),
Mumbai-400013.

The States of Gujarat, Maharashtra, Madhya Pradesh and Goa and the Union Territories of Daman and Diu and Dadra and Nagar Haveli

Telegraphic address 'PATOFFICE"

Patent Office Branch.
Unit No. 401 to 405, IIIrd Floor,
Municipal Market Building,
Saraswati Marg, Karol Bagh,
New Delhi-110 005.

The State of Hariyana, Himachal Pradesh. Jammu and Kashmir, Punjab, Rajastan. Uttar Pradesh and Delhi and the Unior Territory of Chandigarh.

Telegraphic address "PATENTOFIC"

Patent Office Branch,
Wing 'C' (C-4, A),
IIIrd Floor, Rajaji Bhavan,,
Besant Nagar, Chennai-600 090.

The Statea of Andhra Pradesh, Karnataka, Kerala, Tamilnadu & Pondicherry and the Union Territories of Laccadive, Minicoy and Aminidivi Islands

Telegraphic address "PATENTOFIS"

Patent Office, (Head Office),
"NIZAM PALACE", 2nd M.S.O.
Building, 5th, 6th & 7th
Floor, 234/4, Acharya Jagadish
Bose Road, CaIcutta-700 020.

Rest of India.

Telegraphic address "PATENTS"

All applications, notices/statements or other documents or any fees required by the Patents Act, 1970 or the Patents Rules. 1972 will be received only at the appropriate Offices of the Patent Office.

Fees :-The fees may either be paid in, cash or may be sent by Money Order or payable to the Controller at the appropriate Offices or by bank draft or cheque payable to the Controller drawn on a, scheduled bank at the, place where the appropriate office is situated,

पेटेंट कार्यालय

एकस्व तथा अभिकल्प

कलकत्ता, दिनांक 27 सितम्बर 1997

पेटेंट कार्यालय के कार्यालयों के पते एवं क्षेत्राधिकार

पेटेंट कार्यालय का प्रधान कार्यालय कलकत्ते में अवस्थित है तथा मुम्बई, दिल्ली एवं चेन्नई में इसके शाखा कार्यालय हैं, जिनके प्रादेशिक क्षेत्राधिकार जोन के आधार पर निम्न रूप में प्रदर्शित हैं :—

पेटेंट कार्यालय शाखा, टाँडो इस्टेट,
तीसरा तल, लोअर परेल (प.),
मुम्बई-400013 ।

गुजरात, महाराष्ट्र, मध्य प्रदेश
तथा गोआ राज्य क्षेत्र एवं संघ
शासित क्षेत्र, दमन तथा दीव एवं
दादर और नगर हवेली ।

तार पता - "पेटोफिस"

पेटेंट कार्यालय शाखा,
एकक सं. 401 से 405, तीसरा तल,
नगरपालिका बाजार भवन,
सरस्वती मार्ग, करोल बाग,
नई दिल्ली-110 005 ।

हरियाणा, हिमाचल प्रदेश, जम्मू
तथा कश्मीर, पंजाब, राजस्थान,
उत्तर प्रदेश तथा दिल्ली राज्य
क्षेत्रों एवं संघ शासित क्षेत्र चंडीगढ़ ।

तार पता - "पेटेंटोफिक"

पेटेंट कार्यालय शाखा,
विंग "सी" (सी 4, ए),
तीसरा तल, राजाजी भवन,
बसन्त नगर, चेन्नई-600090 ।

आन्ध्र प्रदेश, कर्नाटक, केरल, तमिलनाडु
तथा पाण्डिचेरी राज्य क्षेत्र एवं
संघ शासित क्षेत्र, लक्षद्वीप, मिनिकाय
तथा एमिनिदिवि द्वीप ।

पेटेंटोफिस

पेटेंट कार्यालय (प्रधान कार्यालय)
निजाम पैलेस, द्वितीय बहुतलीय कार्यालय
भवन, 5, 6 तथा 7वां तल,
234/4, आचार्य जगदीश बोस मार्ग,
कलकत्ता-700 020 ।

भारत का अवशेष क्षेत्र ।

तार पता - "पेटेंट्स"

पेटेंट अधिनियम, 1970 या पेटेंट नियम, 1972 में अपेक्षित सभी आवेदन-पत्र सूचनाएं, विवरण या अन्य प्रलेख पेटेंट कार्यालय के केवल उपयुक्त कार्यालय में ही प्राप्त किए जाएंगे ।

शुल्क : शुल्कों की अदायगी या तो नकद की जाएगी अथवा उपयुक्त कार्यालय में नियंत्रक को भुगतान योग्य धनादेश अथवा डाक आदेश या जहां उपयुक्त कार्यालय अवस्थित है, उस स्थान की अनुसूचित बैंक से नियंत्रक को भुगतान योग्य बैंक ड्राफ्ट अथवा बैंक दुधारा की जा सकती है ।

APPLICATION FOR PATENT FILED AT THE HEAD OFFICE 234/4, ACHARYA JAGADISH BOSE ROAD, CALCUTTA-20.

The dates shown in the crecent brackets are the dated claimed under Section 135, of Patent Act. 1970.

01-08-1997

1429/Cal/97. C.A. Greiner & Sohne Gesellschaft m.b.H., "Closure device, Separating device and holding container for a holding device

method for making the same (Convention No.

1131/Cal/97. CAL International Limited " A pharmacutical

960621 on 4-9-6; 970053 on 28-1-97 in Ireland)

1432/Cal /97 CAL International Limited " A process for preparing a pharmaceutical composition" (Convention No. 960559 on 2-8-96; 960621 on 4-9-96; 970053 on 28-1-97 in Ireland).

1433/Cal/97. Philips Petroleum Company. "Process to rejuvenate spent sorbents". (Convention No. 08/702426 on 14-8-96 in U.S.A.).

1434/Cal/97. Eaton Corporation, "Transmission shifting mechanism and position sensor", (Convention No. 695,052 on 9th August, 1996 in U.S.).

1435/Ca1/97. W. Schlafhorst A.G & Co., "Thred guiding; equipment". (Convention No. P19635695 4 on 3-9-96 in Germany).

04-08-1997

1436/CaI/97. Telefonaktiebolaget L.M. Ericsson "Radio comunications systems and methods for iittered beacon transmission" (Convention No 08/708,039 on 30-8-96 in U.S.A.).

1437/Cal/97. Telefonktieobolaget. L.M. Ericsson,. "Method and systems for mobile terminal asisted handover-in a provate radio communications network (Convention No. 08/705,724 on 30-8-96 in U.S.A.).

1438/Cal/97. Clarlant GMBH. "Novel light stablizers based on sterically hindered amines" (Convention No. 19631244.2 on 2-8-96 in Germany

1439/Cal/97. Technical Research and Development Foundation Ltd., "Microelectronic components their fabrication and electronic network comprising them".

1440/Cal/97. Siemens Aktiengesellschaft, "Combination chip module and method for manufacturing a combination chip module". (Convention No. 19632115.8 on 8-8-96 in Germany).

1441/Cal/97. Siemens Aktiengesellschaft, "Data carrier for transmission of electrical signals". (Convention No. 19632117.4 on 8-8-96 in Germany).

1442/Cal/97, Siemens Aktierisesellschaft, & PAV Card GMBH, "Smart card module, combination smart card containing this module and method for producing the same". (Convention No. 19632813,6 on 14-8-96 in Germany)..

1443/Cal/97. Merck Patent Gesellschaft Mit Bechrankter Haftung, 'Thlenopyrirnidines". (Convention No, 19632423.8 on 12-8-96 in Germany).

1444/Cal/97. Merck Patent Gesellschaft Mit Beschrankter Haftung., "Arylalkanoylapyridazines" (Convention No, 19632549.8 on 13-8-96 in Germany),

05-08-1997

1445/Cal/97. Dainippon Ink and Chemicals, Inc., "Disazo pigment composition and printing ink". (Convention No. 3-209794 on 8-8-96 in Japan).

1446/Cal-/97. Samsung Electronics Co. Ltd., "Optical isolator". (Convention No. 96-80099 on 31-12-96; 96-80100 on 31-12-96 and 97-9555 on 20-3-97 in Republic of Koroa).

14477Cal/97. Kufner Textilworke GMBH, "Non-Woven composite a process for its production and its use", (Convention No. 19636722.0 on 10-9-96 in Germany) .

11448/Cal/97. Kufner Textilwerke GMBH, "Elastic interlining". (Convention No. 19644111.0 on 23-10-96 in Germany).

1449/Cal/97. Merck Patent Gosellschaft Mit Beschrankter Haftung, "Pharmaceutical composition containing 4-oxobutarioic acids". (Convention No, 9610254 on 16-8-96 in France).

1450/Cal/97. PPG Industries, Inc., "Cationic electrocoating compositions method of making and use", (Convention No. 09/700977 on 21-8-96 in U.S.A.).

1451/Cal/97. Siemens Aktiengesellschaft & Thyssen Guss Aktiengesellschaft, "Method and setup for directed freezing of a melt". (Convention No. 19631767 3 on 6-8-96 in Germany).

06-08-1997

1452/Cal/97. Jatinder Kumar Arya and E. P. Industrial & Agro Chemicals Pvt. Ltd., "An improved process or producing sodium carboxy methyl cellulose (CMC).

1453/Cal/97. Nokia Telecommunications OY, "Procedure for limiting the mobility area of a therminal device in a wireless local loop and apparatus therefor". (Convention No. FI-963191 on 14-8-96 in Finland).

1454/Cal/97. American Cyanamid Company, "Herbicidal 2, 6-Disubstituted pyridines and 2, 4-Disuhstituted pyrimidines". (Convention No. 08/693,422 on 7-8-96 in U.S.A.).

1435/Cal/97. American Cyananmid Company, "Process for the preparation of Herbicide 2, 6-Disubutituted pyridnes and 2, 4-Disubstituted pyrimidines". (Convontion No. 08/693,422 on 7-8-96 in U.S.A,).

1556/Cal/97. Akticbolaget Plectrolux, "Spirit stove".

1457/Cal/97. Siemens Aktiengesiellschaft, "Electrically weak conducting material for manufacturing of one insulated jacket". (Convention No. 19631897.1 on 7-8-96 in Germany).

1458/Cal/97. Krone Aktiengesellschaft, "Method for synchronizing at a constant bit rate in ATM networks and circuit arrangement for carrying out the method". (Convention No. 19644238.9 on 24-10-96 in Germany).

1459/Cal/97. Krone Aktiengesellchaft, "Method for dynamic channel allocation in radio systems, especially for wireless local loop (WLL) systems, and device for carrying out the method". (Convention No. 19644436.5 on 25-10-96 in Germany),

1460/Cal/97. Fukuoka Kagaku Ltd., "Apparatus for preventing a driver from dozing off during driving". (Convention No. H9-64683 on 18-3-97 in Japan;.

07-08-1997

1461/Cal/97. Kabushiki Kaisha T AN T., "Switch". (Convention No. 8-286530 on 29-10-96 in Japan).

1462/Cal/97. Kabushaki Kaisha T AN T., "Switch, connect-in structure". (Convention No. 8-279610 on 22-10-96 in Japan).

1463/Cal/97. Kabushiki Kaisha T AN T., "Switch connecting structure". (Convention No. 8-279609 on 22-10-96 in Japan).

1464/Cal/97. W. Schlafhorst AG & Co., "Conveyor system for a textile machine". (Convention No. P19636661.5 on 10-9-96 in Germany).

1465/CaI/97. A,BB Air Preheater, Inc., "Semi-Modular pin-rack seal". (Convention No. 705;998 on 30-8-96 in U.S.A.).

1466/Cal/97. Matsushita Electric Industrial Co. Ltd., "Refrigerating apparatus". (Convention No, 8-275787 on 18-10-96 in Japan).

1467/Cal/97. General Electric Company, "Method and apparatus for helical image reconstruction in a computed tomography fluoro system". (Convention No. 08/729,435 on 11-10-96 in U.S.A.).

1468/Cal/97: General Electric Company, "Method and apparatus for scanning an object and displaying an image in a computed tomography system". (Convention No. 08/733/502 on-18-10-96 in U.S.A.).

08-08-1997

1469/Cal/97. Lawrence Alexander Hruschak, "Method for making stots in metal pipe".

1470/Cal/97. Metzeler Automotive Profiles GMBH, "Profile frame for a movable window pane". (Convention No. 196 32 843.8 on 14-8-96 in Germany).

1471/Cal/97. Indian Jute Industries Research Association. "Electronically controlled driving system for the conventional jute beaming machine".

1472/Cal/97. Siemens Aktiengesellschaft, "Circuit-Breaker system with isolating functions". (Convention No. 19633524.8 on 9-8-96 in Germany).

1473/Cal/97. Siemens Aktiegesellschaft, "Circuit-Breaker system with isolating functions". (Convention No. 19633522.1 on 9-8-96 in Germany).

1474/Cal/97. Windmoller S. Holscher, "Adhesive application device". (Convention No. 19634594.4 on 27-8-96 in Germany).

11-08-1997

1475/Cal/97. Iberoamericana Del Embalaje, S.A., "Improved lightweight container" (Convention No.. 9602200 on 12-8-96 in Spain).

1476/Cal/97. Advanced Technology Laboratories, Inc., "Ultrasonic diagnostic imaging system with universal access to diagnostic information and images". (Convention No. 08-719.360 on 25-9-96 in U.S.A.).

l477/Ca/97. Advanced Technology Laboratories, Inc., Ultrasonic diagnostic imaging system with personal computer architecture "(Convention No. 08/712,828 on 12-9-96 m U.S.A.)

1478/Cal/97. Eaton Corporation, "Low inertia ball ramp actuator". (Convention No. 700 250 on 20-8-96 in U.S.).

1479/Cal/97. Eaton Corporation, "Down-shift control method/ system for vehicular :automated mechanical transmission". (Convention No. 9617956.9 on 28-8-96 in U.K.).

1480/Cal/97. Eaton Corporation, "Actuator system for vehicular automated clutches with electric motor actuator and pressurized override". (Convention No. 9617930.4 on 20-8-96 m U.K.).

1481/Cal/97, Owens Corning, "Chemical . treatment for fibers and wire-coated composite strands for molding fiber-reinforced thermoplastic composite articles". (Convention No. 03/695,504 on 12-8-96 in U.S.A.).

1497/Cal/97. Energemus, Inc., Sem condactorsupercapacitor system, method for making same and articles produced therefrom. (Convention No. 60/023,837 on 12-8-96 in U.S.A.).

1498/Cal/97. Glaxo Wellcome SPA,, "Tetrahydroqinoline derivatives'. (Convention No. 961/303.9 on 17-8-96 in United Kingdom).

1499/Cal/ 97. Samung Electronics Co. Ltd., "Circuit for eliminating external lnterference signals in code division rnultiple access mobile phone. (Convention No. 49/45/1996 on 29-10-96 in Koorea).

1500/Cal/97. Vacuumsclmelze GMBH, "Method and apparatus for the production of an inductive component". (Convention No. 19636073.0 on 5-9-96 in Germany).

1501/Cal/97. Hitachi, Ltd., (2) Hitachi Device Engineering Co. Ltd., "'Cathode ray tube, . (Convention No. 228382 on 29-8-96 in japan).

1502/Cal/97. Merck Parent Gesellschaft Mi. Beschrankter Haftung "Process for the preparation of bone cements comprising active compound". (Convention No. 19641775.9 on 22-8-96 in Germany

1503/Cal/97, (1) Hitachi, Ltd., (2) Hitachi Car Engineering Co. Ltd., "Apparatus for forming air-fuel mixture for internal combustion engine and engine system". (Convention No. 08--217675 on 20-8-96 in Japan).

1504/Cal/97. Daewoo Electronics Co. Ltd, Scalable intercontour coding method and apparatus (Convention No, 97-2/561 on 20-6-97 in South korea).

1505/Cal/97.KanekaCorporation"Medicinalcomposition compriamg coenzyme Q10". (Convention No. 8-234729 on 16-8-96 & 9-173191 on 13-6-97 in Japan).

1506/Cal/97. Add-Vision, lnc, Electroluminescent lampdesigns'. (Convention No. 60/023923 on 14-8-96; 60/031715 on 22-11-96; 60 040610 on 17-3-97; 60/043/84 on 11-1-97 and Nil on 13-8-97 in U.S.A.).

1507/Cal/97. E I DU Pont De Nemours and Company, "Arthropodicidal . and fungicidal cyclic aceta|s . (Convention No. 60/017,182 on 30 9-96 in U.S.A.).

1508/Cal/97. Dystar Textilfaarben GMBH & Co. Deutschladn KG,, "Dyestuff mixture of fibre-reactive azo dyestufts and their use for dyeing fiber material containing hydroxyj and/or carboxamide groups". (Convention No. 19633999.6 on 5-9-96 in Germany),

1509/Cal/97. Siemens Hearing instruments , Inc., "Hearing aid and system for use with cellular telephones". (Convention No. 08/701,408 on 22-8-96 in U.S.A.).

1510/Cal/97. Siemens Medical Systems, Inc., "Compact solid state klystron power supply" (Convention No. 08/704,054 on 28-8-96 in U.S.A.)

151l/Cal/97 . Eugene Dolgolf (2) Louis Tullo., 'Display system". Convention No.. 60/023, 677 on 16-8-96 08/774,569 on 31- 12-96 & 08.795,237 on 10-2-97 in U.S.A.).

l512/Cal/97, Orlandi Raul Maria, System f o r regional ething of holagraphic microetchings diffraction gratings Kinograms , pixelgrams or other on sheets".. "(Convention No. M196A 001866 on 11-9-96 in Italy).

COMPLETE SPECIFICATION ACCEPTED

Notice is hereby given that any person interested in opposing the giant of patents on any of the Applications concerned may, at any time within four months of the date of this issue or within such further period not exceeding one month applied for on Form-14 prescribed under the Patents Rules, 1972 before the expiry of the said period of four months given notice to the Controller of Patents at the appropriate office on the prescribed Form-15, of such opposition. The written statement of opposition should be filed alongwith the said notice or within one month, of its date as prescribed in Rule 36 of the Patents Rules, 1972.

The classifications given below in respect of each specification are according to Indian Classification and International Classification.

Typed or photo copies of the specifications together with photo copies of the drawings, if any, can be supplied by the patent office, Calcutta or the appropriate Branch Office on payment of the prescribed copying charges which may be a ascertained on application to that office. Photo copying charges may bo calculated by adding the number of pages in the specification and drawing sheets mentioned below against each accepted specification and multiplying the same by two to get the charges as the copying charges per page are Rs. 2/-:

स्वीकृत सम्पूर्ण विनिर्देश

एतद्द्वारा यह सूचना दी जाती है कि सम्बद्ध आवेदनों में से किसी पर पेटेंट अनुदान के विरोध करने के इच्छुक कोई व्यक्ति, इसके निर्गम की तिथि से चार (4) महीने या अग्रिम ऐसी अवधि जो उक्त 4 महीने की अवधि की समाप्ति के पूर्व पेटेंट नियम, 1972 के तहत विहित प्रपत्र 14 पर आवेदित एक महीने की अवधि से अधिक न हो, के भीतर कभी भी नियंत्रक, एकस्व को उपयुक्त कार्यालय में ऐसे विरोध की सूचना विहित प्रपत्र 15 पर दे सकते हैं। विरोध संबंधी लिखित वक्तव्य उक्त सूचना के साथ अथवा पेटेंट नियम, 1972 के नियम 36 में यथा विहित इसकी तिथि के एक महीने के भीतर ही फाइल किए जाने चाहिए ।

"प्रत्येक विनिर्देश के संदर्भ में नीचे दिए वर्गीकरण, भारतीय वर्गीकरण तथा अन्तर-राष्ट्रीय वर्गीकरण के अनुरूप हैं ।"

रूपांकन (चित्र आरेखों) की फोटो प्रतियां यदि कोई हों, के साथ विनिर्देशों की अंकित अथवा फोटो प्रतियों की आपूर्ति पेटेंट कार्यालय, कलकत्ता अथवा उपयुक्त शाखा कार्यालय द्वारा विहित लिप्यान्तरण प्रभार जिसे उक्त कार्यालय से पत्र व्यवहार द्वारा सुनिश्चित करने के उपरांत उसकी अदायगी पर की जा सकती है । विनिर्देश की पृष्ठ संख्या के साथ प्रत्येक स्वीकृत विनिर्देश के सामने नीचे वर्णित चित्र आरेख कागजों को जोड़कर उसे 2 से गुणा करके, (क्योंकि प्रत्येक पृष्ठ का लिप्यान्तरण प्रभार 2/- रु. है) फोटो लिप्यान्तरण प्रभार का परिकलन किया जा सकता है ।

"AN ELECTRODELESS DISCHARGE LAMP WITH CONDUCTIVE SCREEN FOR REDUCING RADIO FREQUENCY INTERFERENCES

Applicant : DIABLO RESEARCH CORPORATION, OF 130 KIFER COURT, SUNNYVALE, CA 94086, UNITED STATES OF AMERICA.

Inventors : (1) NICHOLAS GERASIMOS VRIONIS,
(2) ROGER SIAO.

Application No. ; 368/Cal/1992 filed on 27th May, 1992.

Appropriate Office for Opposition Proceeding (Rule 4, (Patents Rules, 1972) Patent Office, Calcatta.

22 Claims

An electrodeless discharge lamp with comductice screen for reducing radio frequency interference comprising :

a discharge vessel sealed in a gas tight manner said discharge vessel having an inner surface and an outer surface ;

a gaseous; mixture disposed within said discharge vessel ;

means for generating an electromagnetic filed for exciting said gaseous mixture, said excited gaseous mixture producing electromagnetic radiation ;

said lamp being characterized by

an electrically conductive screen is embedded within or disposed on or outside the outer surface of said discharge vessel, said screen comprising a plurality of electrically conductive paths separated by openings.

"AC MOTOR DRIVE SYSTEM".

Applicant : YORK INTERNATIONAL CORPORATION OF P.O. BOX 1592 YORK, PENNSYLVANIA 17405-1592 UNITED STATES OF AMERICA.

Inventors : (1) WILLS FRANK EUGENE,
(2) SCHNETZKA II HAROLD ROBFRT,
(3) HOFFER ROY DANIEL.

Application No. : 545/Cal/1992 filed on 31st July, 1992;

Appropriate Office for Opposition Proceedings (Rule 4, Patents Rules, 1972) Patent Office. Calcutta,

24 Claims

An AC motor drive system, comprising :

two-phase power supply means (230) for converting an inputted power supply voltage (202, 204) into a first phase AC voltage and a second phase AC voltage of a two phase AC output voltage, said two-phase power supply means (230) generating the two-phase AC output voltage such that a ratio of respective magnitudes of the second phase voltage to the

first phase voltage has a preselected value greater than 1, said two phase power supply means having a first pair of output terminals) (260, 262) across which the first, phase voltage is provided and a second pair of output terminals (264, 266) across which the second phase voltage is provided;

an AC motor (150) having first winding (152) and a second winding (154) ;

said first winding having first and second ends (I, I) and a first winding impedance;

said second winding having first and second ends)K.L) and a second winding impendance that is greater than said first impedance said last and second windings being conductively isolated from each other ;

the first and second ends of said first winding respectively connected to said first pair of output terminals of said two-phase power supply means ; and

the first and second ends of said second winding respectively connected to said second pair of output terminals of said two-phase power supply means

whereby said two-phase power supply means converts the inputted power supply voltage to first and second phase AC voltages respectively provided on said first and second pairs of output terminals to drive said motor.

"A METHOD FOR THE CONTINOUS PRODUCTION OF SEALING SHEETING IMPERVIOUS TO WATER AND OIL".

Applicant :NAUF-FASERTECHNIK GMBH & CO.KG OF WARTTURMATRASSE- 1, D-4990 LUBBECKE 1, GERMANY.

lnventoes, : GEORGE HEERTEN.

Application No, ; 73/Cal/1993 filed on 8th February, 1993.

Appropriate Office for Opposition Proceedings (Rule 4, Patents Rules, 1972) Patent Office, Calcutta.

7 Claims

A method foe the continuous production of sealing sheeting impervious to water and oil, which essentially consists of a substrate, layer, a layer of swellable clay, more particularly bentonite and a covering layer being a non-woven material and (a) the dry pulverulent or granuler swellable clay being applied to the substrate; layer (b), the coyering/layer is placed thereover and (c) the resulting triple-layer material is passed through a needle punching machine for the purpose of needle panching together the substrate layer and the covering layer, characterised in the step (d) of applying a pulverulent swellable clay to the top surface of the cover ing layer consisting of non-woven moteri prior to the step of needle punching (f) the resulting quardruple-layer material is needle punched (f), the swellable clay needle punched into the covering layer is moistened with water to cause swelling of the clay and (g) then dried again.

A MOSQUITO/INSECT REPELLENT DEVICE".

Applicant : RECKITT & COLMAN OF INDIA LIMITED, OF 41 CHOWRINGHEE ROAD, CALCUTTA-700.071, INDIA.

Inventor :: DR. RAJAT KANTT BAISYA.

Application No.: 124/Cal/1993 filed on 1st March, 1993.

(Complete specification left after provisional on 13th October, 1993).

Appropriate Office for Opposition Proceedings (Rule 4, Patents Rules. 1972) Patent Office, Calcutta.

10 Claims

A mosquito/insect repellent, device for heating a mat such as that used in mosquito/insect repellent purposes comprising ;

a bottom cover,;

a heater assembly ;

a top cover having opening for insertion of said mat therethrough. for placement on said healer assembly;

means provided on said top and bottom covers to affect a detachable fitting of said top and bottom covers to form a compact housing for said heater assembly ;

a plug detachably and rotatably secured with respect to said top and bottom covers; and

said heater assembly and said rotatable plug being electrically connected to one another for supply of electrical energy for heating purpose.

"IMPROVED PROCESS FOR THE PRODUCTION OF OXIDIZED CAUSTIC WASTE WATERS IN A NICKEL-BASE ALLOY WET OXIDATION SYSTEM, WITHOUT CORROSION TO THE MATERIALS OF CONSTRUCTION OF SUCH SYSTEM."

Applicant : ZIMPRO PASSAVANT ENVIRONMENTAL SYSTEMS. INC OF 301 WEST MILITARY ROAD, ROTHSCHILD, WISCONSIN 54474, UNITED STATES OF AMERICA.

Inventor : JOSEPH ALLEN MOMONT,

Application No. : 152/Cal/1993 filed on I5th March, 1993.

Appropriate office for. opposition proceedings (Rule 4, Patent Rule 1972) Patent Office Calcutta.

7 Claims

An improved process for the production of oxidized caustic wastewater, by wet oxidation treatment of a raw caustic wastewater, So as to prevent corrosion to the materials of construction of a nickel-base alloy wet oxidation system, in which the raw caustic wastewater is treated at elevated temperature and pressure, said process comprising the steps of:

(a) establishing a flow of caustic wastewater and oxygen containing gas through said wot oxidation system to produce on, oxidized gas/liquid mixture;

(b) separating said oxidized gas/liquid mixture into an oxidized liquid phase effluent and a gaseous phase effluent;

(c) measuring the carbon dioxide content of said gaseous phase effluent to establish a baseline carbon dioxide content Value while the pH of said system liquid effluent remains at 7 or above; and

(d) adding sufficient alkalinity to said raw caustic wastewater to maintain said system liquid effluent pH at 7 or above, upon the carbon dioxide content of said gaseous phase effluent exceeding said baseline value by a selected proportion, to produce a treated caustic wastewater, thereby preventing excessive corrosion to the material of construction of laid wet oxidation system.

A PROCESS OF MANUFACTURING A TRANSDERMAL DRUG DELIVERY SYSTEM.

Applicants HARROGATE HOLDINGS LIMITED, A BERMUDA CORPORATION, ORGANISED AND EXISTING UNDER THE LAWS OF BERUMODA AND HAVING ITS OFFICE AT CEDAR HOUSE- 41 CEDAR AVERNUE POST BOX NO. HM 1179, HAMILTON HM EX-BERMUDA.

Inventors : (1) ROBERT B ROYDS
(2) JOHN LIM
(3) JOEL D. ROSEN.

Application No. 32/BOM/95 filed on 20-1-95:

Appropriate Office for Opposition Proceedings (Rule 4, Patents Rules 1972), Patent Office Branch, Miumbai-13.

18 Claims

"A process of manufacturing a transdermal drug delivery system for the delivery of a drug across the skin of a user comprising the steps of forming a shell, said shell providing an occlusive covering on the skin of the user to enhance the hydration of the skin, and forming in said shell a reservoir* having a first face and a second face.

forming in said reservoir a matrix adapted to absorb moisture from the skin and hydrate the skin," whereby a drug within the reservoir can penetrate the skin, dispersing microcapsule within the matrix of said reservoir, said microcapsules having contained therein an effective concentration of the drug;

applying adhering means to said first face of said reservoir for adhering said shell to the skin; and

applying to said reservoir a visible indicator operalively associated with said second face of said reservoir, said indicator comprising a reagent formulated to visibly change in response to the presence of moisture, electrolytes or other Secreations in said-matrix.

(4) PETER JOHN MCC- LURE

Application No. 64/BOM/95 filed on,. 13-02-95

Appropriate Office for Opposition Proceedings (Rule - 4, Patents Rules, 1972) Patent Office Branch, Mumbai-400 013.

15 Claims.

A process of producing an ambient stable food product which include a preservative selected from an inorganic acid, an organic acid, the salts thereof and mixtures thereof, having an equlibrium pH of from 4.7 to 6.5 and an A_w of from 0.94 to 0.999 wherein the food product is heated to a temperature of from 90-l30°C for a time sufficient to provide a microbiologically safe ambient stable food product, such that any bacterial spores contained in the food product are injured and cannot grow, and not all bacterial spores are inactivated providing that;

When the product temperature is greater than 100°C and the equilibrium pH is 6.5 the A_w is >0.94 and the product is heated sufficiently to achieve an $F_o < 2.45$;

when the product temperature is >100°C and the equilibrium pH is from 6 to < 6.5 ; the A_w is >0.95 and the product is heated sufficiently to achieve an F_o <2,45 ;

when the product temperature is>100°C and the equilibrium pH is from 5.5 to < 6.0 ; the A_w is 5> 0.95 and the product is heated sufficiently to achieve an F_0 <2.0 ;

When the product temperature is> 100°C and the equilibrium pH is from 5.0 to 5.5 The A_w is >0.95 and the product is heated sufficiently to achieve an F_0 <1.5; and

when the product temperature is>100°C and the equilibrium pH is from 4.7 to < 5.0 and A_w is >0.95 and the product is heated sufficiently to achieve an F° <1.0

PROCESS FOR THE PREPARATION OF 1NSECTICID EMULSIFIABLE CONCENTRATE USING NONEDIBL VEGETABLE OILS IN SPONTANEOUS EMULSIO FORM.

Applicants : PROF. SHARAD GOVIND D1XIT AND UNIVERSITY OF BOMBAY, MATUNGA, BOMBAY 400 019. MR ANAND RAMCHANDRA MAHADES' WAR.

Application No. 347/Bom/1995 filed on 7th Aug. 199;

Appropriate Office for Opposition Proceedings (Rule Patents Rules 1972), Patent Office Branch, Mumbai-13.

7 Claims

Process for the preparation of Insecticide emulsifiable concentrate comprising :—

(a) At least two nonedible oils selected from the group consisting of terpenes and azardiracd, .in as herein described; flavonids, fuvano and chromenoflavoniods as herein described and mono and resquiterpenoids and mixtures thereof.

(b) The mixture of oils as herein described were then heated to 60°C for 4-5 min. with constant stilling. Chemical interaction between the active ingredients present in respective oik takes place, leading to the formation of blend of oil having synergistive property.

(c) The blend of oil as described herein was then dilutted with aliphatic solvent to form the liquiflable concentrate.

(4) Blend of nonionlc emulsifir was prepared by mixing the two nonionic emulsifiers in appropriate quantity. The blend was then heated to 50-55°C with constant stirring lading to the chemical interaction between the nonionic emulsifiers, The blend of nonionic emulsiflers thus prepared was suitable for the formation of emulsion.

(e) The blend of nonionlc emulsifier as described herein was then added to liqulfiable concentrate with constant stirring to form the emulsifiable concentrate.

(f) To the emulsifiable concentrate minor ingredients (viz. colourant spraying aid) were also added.

DATA PROCESSING APPARATUS FOR DYNAMICALLY 'SETTING TIMING IN A DYNAMIC MEMORY -SYSTEM.

Applicant : INTERNATIONAL BUSINESS MACHINES CORPORATION, A COMPANY ORGANIZED AND EXISTING UNDER THE LAWS OF THE STATE OF NEW YORK, USA; OF ARMONK, NEW YORK 10504, USA.

Inventors : (1) ALFREDO ALDERECUIA
(2) PATRICK MAURICE BLAND
(3) DARYL CARVIS CROMER
(4) ROGER MAX STUTBS.

Application No. 110/MAS/91 filed on llth Feb./91. .

Appropriate Office for Opposition Proceedings (Rule 4, Patents Rules. 197), Patent Office, Madras Branch

7 Claims

A data processing apparatus for dynamically setting liming in a dynamic memory system, said apparatus comprising a dynamic read/write memory with a plurality of memory modules each having a plurality of addressable storage locations; a single memory controller for controlling operation of ail of said memory modules; a processor operable to selectively produces accessing signals with cycle cefinition and address signals for initiating memory access cycles to read data from said memory and write data into said memory, and bus meansinterconnectingsaidprocessorsaidmemory,andsaid memory controller to transfer data, and accessing signals therebetween; each said memory module being accessible in response to receiving module operating signals with read/-write row address, column address, row address strobe (RAS), and column addreess strobe (CAS) signals said memory controller having transmitting means to transmit said module operating signals to a memory module in response to receiving accessing signals from said processor, said memory controller further comprising (a) liming means with a dock input line for receiving system clock signals and operating said memory controller at the speed of said system clock signals; (b) a plurality of programmable definition registers each assocated with different module from said memory modules, each said definition register being operative to store pulse control signals specific to the timing requirement of the associated memory module, said pulse control signals in each definition register specifying said timing requirements as integral numbers of said clock periods, (c) a sequencer connected to said memory for generating said module operating signals; (d) and gate meansresponsiveto said address signals, for gating said pulse control signals from the definition register associated with the memory module being addressed to said sequencer, having setting means to set the to set the timing of said module operating signals in accordance with the timing requirements specified by said pulse control signals.

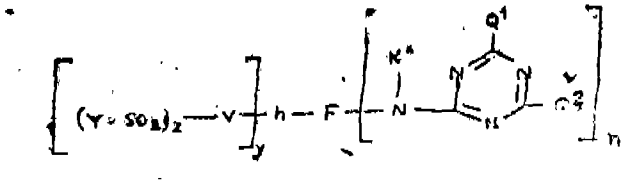
Appropriate Office for Opposition Proceedings (Rule 4, Patents Rules 1972), Patent Office Calcutta.

12 Claims

1. A process for the preparation of a dyestaff corresponding to the Formula (I)



in which

F is the radical of amomtazo or polyazo dyestuff or of a heavy metal complex azo dyestuff derived therefrom, or of an anthraquinone. phthalocyanine, formazan, dioxazine, phenazine; stilbene, triphenylmetnane, xanthene. thioxanthene, nitroaryl, naphthaquinone, pyrenequinone or pery-lenetetracarbimide dyesuff;

Rx is a hydrogen atom or an alkyl group having 1 to 4 carbon atoms, which can be substituted by halogen, hydroxy, cyano, alkoxy having 1 to 4 carbon atoms, alkoxycarbonyl having 2 to 5 cartoon atoms, carboxy, sulfamoyl, sulfo or sulfato;

n is the number 1 or 2;

V is a direct bond or an alkylene group, or is an optionally substituted arylene radical or an alkylenearylene or arylene-alkylene or alkylene-arylene-alkylene or arylone-alkylene-arylene radical, or an arylene-arylene radical which is interrupted by a hetaro group, in which , the alkylene radicals are those having 1 to 8 carbon atoms and can be substituted and the arylene radicals are optionally substituted phenylene or naphthylene radicals, and in which the alkylene radicals can be interrupted by one or more hereto croups and the alkvlene and arylene moieties in the combined alkvlene-arylene radicals in each case can be separated from one another by a hetero group;

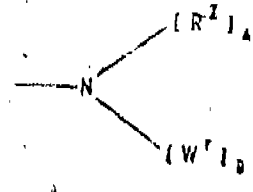
is the number 1' or 2;

is the number 1 or 2;

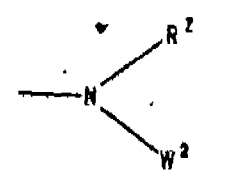
is an nitrogen atom, if y is 2, or, if y is 1, Is a group of the formula -NH-, -N(R)-, where R has one of the abovementioned meanings, 'NH-CO-NH-, -NH-CO- or -CO-NH-, or a direct bond;

is the vinyl group or is an ethyl group, which contains, in the B-position, a substituent which can be eliminated under alkaline conditions, in which the group(s) -SO-Y can be bonded to an aromatic carbon atom of F or V via an alkylene radical having 1 to 4 carbon atoms or via an alkylaraino group having 1 to 4 carbon atoms;

and Q2 are both, with meanings which are Identical to one another or different from one another, each alkyl having 1 to 4 carbon atoms, which is substituted by 1 or 2 alkanoyl groups having 2 to 5 carbon atoms or by 1 or 2 alkoxycarbonyl groups having 2 to 5 carbon atoms or by one of these alkoxycarbonyl and one of these alkanoyl groups, or are a group of the formula (2A), (2b), (2c) or (2d)



(2a)



(2b)

in which (2c) (2d)

R2 is a hydrogen atom or an alkyl group having 1 to 6 carbon atoms, preferably 1 to 4 carbon atoms, which can be substituted by 1 or 2 substituents from the group comprising halogen, hydroxy cyano. alkoxy having 1 to 4 carbon atoms, carboxy, carbalkoxy having 2 to 5 carbon atoms, phenoxycarbonyl, alkanoyl having 2 to 5 carbon atoms, benzoyl, sulfobenzoyl, sulfamoyl, sulfo and sulfato. and/or by a phenyl radical which is optionally substituted by substituents from the group comprising halogen, alkoxy having 1 to 4 carbon atoms, alkyl

having 1 to 4 carbon atoms, sulfo and carboxy, or is a cycloalkyl radical having 5 to 8 carbon atoms, or is a phenyl radical which is optionally substituted by substituents from the group comprising halogen, a koxy having 1 to 4 carbon atoms, alkyl having 1 to 4 carbon atoms, sulfo and carboxy,

W^1 is alkyl, aryl, a1kylene-aryl, arylene-alkyl, alkylene-arylene-alkyl or arylene-alkylene-aryl. radical, in which the alkylene radicals or alkyl radicals are those having 1 to 8 carbon atoms and can also be substituted by substituents which are not fiber-reactive and the arylene radicals or aryl radicals are phenylene or naphthylene radicals or, repsectively, phenyl or naphthyl radicals, which are optionally also substituted by substituents which are not fiber-reactive, and in which the alkylene radicals can be interrupted by one or more hetero groups and the alkylene and arylene portions or alkyl and aryl portions in the combined alkyl (ene)/aryl (ene) radicals in each case can be separated from one another by a hetero group, or

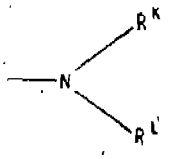
the radicals-[RZlA and -[W^1B, and radicals [R2]A and [W^1]B together with the nitrogen atom, form a heterocyclic radical which is built up from an alkylene radical having 3 to 8 carbon atoms, or a heterocyclic radical which is built up from a further hetero group and two alkylene radicals having 1 to A carbon atoms,

A is the number zero or 1 and

B is the number 1 or 2,

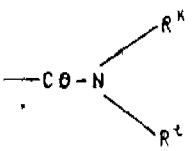
in which the sum of (A+-B) is the number 2 and in which, if B is 2, the groups W^1 can have the same meaning as one another or meanings which differ from one another,

W^2 is cyano, or is a group of the formula (2e), (2f) or



(2e)

(2f)



(2g)

in which.

RK is a hydrogen atom or an alkyl group having 1 to 4 carbon atoms, or is an alkyl group having 1 to 4 carbon atoms, which is substituted by sulfo, carboxy, phosphato, sulfato, hydroxy, cyano, alkoxy having 1 to 4 carbon atoms, phenyl or phenyl which is substituted by substieuents from the group comprising sulfo, carboxy, alkyl having 1 to 4 carbon atoms, alkoxy having 1 to 4 carbon atoms, chlorine and nitro, or is a cycloalkylene radical having 5 to 8 carbon atoms,

RL is hydrogen, alkyl having 1 to 4 carbon atoms, or alkyl having 1 to 4 carbon atoms, which is substituted by sulfo, carboxy, phosphato, sulfato, hydroxy, cyano, alkoxy having 1 to 4 carbon atoms, phenyl or phenyl which is substituted by substituents from the group comprising sulfo, carboxy, alkyl having 1 to 4 carbon atoms, alkoxy having 1 to. 4 carbon atoms, chlorine and nitro, or is phenyl, which can be substituted by 1, 7. or 3 substituents from the group comprising alkyl having 1 to 4 carbon atoms, alkoxy having 1 to 4 carbon atoms, chlorine, sulfo, carboxy and nitro, or

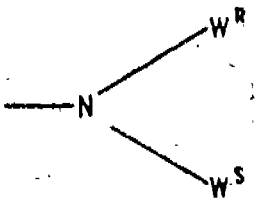
Rk and Rl, and radicals Rk and Rl together with the nitrogen atom, form a heterocyclic radical which is built up from an alkylene radical having 3 to 8 carbon atoms, or a hetrrocyclic radical which, is built up from a further hetero group and two alkylene radicals having 1 to 4 carbon atoms, or

Rz and W^2. together with the nitrogen atom form a heterocyclic radical which is built up from a alkylene radical having 3 to 8 carbon atoms or a heterocyclic radical which is built up from a further hetero group and two alkylene radicals having 1 to 4 carbon atoms,

Ra is hydogen or alkyl having 1 to 4 carbon atoms, which can be substituted by halogen, nitro alkanoyl having 2 to 4 carbon atoms, hydroxy, cyano, alkoxy having 1 to 4 carbon atoms, sulfo, sulfato, carfooxy, phenyl or sulfo-substituted phenyl, or is alkenyl having 3 to 5 carbon atoms or alkinyl having 3 to 5 carbon atoms, or is cycloalkyl having 5 to 8 carbon atoms, or is phenyl, naphthyl, phenyl which is substituted by 1 or 2 substituents from the group comprising alkyl having 1 to 4 carbon atoms, alkoxy having 1 to 4 carbon atoms, sulfo and carboxyl, or naphthyl which in substituted by 1, 2 or 3 sulfo groups, or cyano, and

Rc is hydrogen alkyl having 1 to 4 carbon atoms, which can be substituted by halogen, hydroxy, alkanovioxy having 2 to 5 carbon atoms. cyano alkoxy having 1 to 4 carbon atoms, carboxy, sulfo, sulfato, phenyl or phenyl which is substituted by 1 or 2 substituents from the group comprising alkvl having 1 to 4 carbon ,atoms, alkoxy having 1 to 4 carbon atoms, sulfo and carboxy, or is alkenyl having 3 to 5 carbon atom or alkinyl having 3 to 5 carbon atoms or is phenyl which can be substituted by methyl, ethyl, methoxy. ethoxy, amino, nitro, carboxy and /or sulfo, or is cyano; or

Q^1 is a group of the formula (2A)



In which

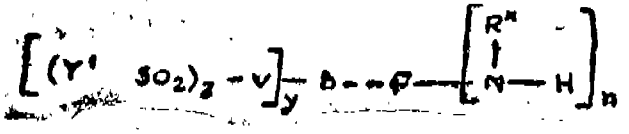
Wr is a hydrogen atom or an alkyl group having 1 to 4 carbon atoms such as the ethyl or methyl group or is an alkyl group having 1 to 4 carbon atoms, which is substituted by sulfo, carboxy, phosphato, sulfato, hydroxy, cyano, alkoxy having 1 to 4 carbon atoms, such as methoxty and ethoxy, phenyl or phenyl which is substituted by substituents from the group comprising sulfo, carboxy, alkyl having 1 to 4 carbon atoms alkoxy having 1 to 4 carbon atoms, chlorine and nitro, or is a cycloalkvl radical having 5 to 8 carbon atoms, such as the cyclopentyl, cyclohexyl or dimcthylcyclobexyl radical,

Ws is hydrogen, alkyl having 1 to 4 carbon atoms, such as ethyl and methyl, or alkyl having 1 to 4 carbon atoms, which is substituted by sulfo, carboxy, phosphato, sulfato, hydroxy, cyano, alkoxy having 1 to 4 carbon atoms, such as methoxy and ethoxy, phenyl or phgnyl which is substituted by substituents from the group comprising sulfo, carboxy, alkyl havin 1 to 4 carbon atoms, alkoxy having 1 to 4 carbon atoms, chlorine and nitro, or is phenyl. which can be substituted by 1, 2 or 3 substituents from the group comprising alkyl having 1 to 4 carbon atoms, such as ethyl and, in particular, methyl, alkoxy having 1 to 4 carbon atoms, such as ethoxy and, in particular, methoxy, chlorine, sulfo, carboxy and nitro, or

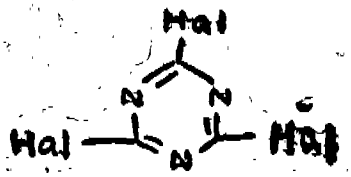
Wr and Ws, together with the nitrogen atom, form a heterocyclic radical which is built up from an alkylene radical having 3 to 8 carbon atoms, preferably 4 to 6 carbon atoms, or a heterocyclic radical which is built up from a further hetero group, such as a nitrogen atom, an oxygen atom or a group -NH-, and two alkylene radicals having 1 to 4 carbon atoms. such as, for example. the N-piperazino; N-piperidino or N-morphol no radical;

Q^2 has one of the meanings given for O^1 excluding dyestuffs of the formula (1) in which 0^1 is the cyanamido group and 0^2 simultaneously is an aryl, " alkylene-aryl,

arylene-alkyl, alkylene-arylenti-alkyl or arylene-alkylene-aryl radical which is substituted by one or more solubilizing substituents and which optionally also contains other substituents and/or can be interrupted by hetero groups, or is a cyanamido radical, or Q^2 is the cyanamido group and Q^1 simultaneously is an aryl, alkylene-aryl, arylene-alkyl, alkylene-arylene-alkyl or arylene-alkylene-aryl radical which is substituted by one or more solubilizing substituents and which optionally also contains other substituents and/or can be interrupted by hetero groups, or is a cyanmido radical which comprises reacting a compound of the general formula (20)



(In which F, Rr. V, h, y, z and n have the above-mentioned meanings and Y^1 has one of the meanings given above (or Y or is the B-hydroxvethyt group), a trihalogeno-s-triazine compound of the general formula (21).



(in which Hal is a hologen atom), a compound of the general formula $H\text{-}Q^1$ and a compound of the general formula $H\text{-}Q^3$ (where Q^1 and Q^2 have ore of the above-mentioned meanings) with one another in stoichiometric amounts in any desired sequence at a pH of from 2 to 10 and at a temperature of from 10 to 100°C and in case that Y^1 is B-hydroxyethyl converting the resulting compounds with that B-hydroxyethylsulfonyl group into a dyestufl according to the above general formula (1) in which Y is B-Sulfatoethyl at a temperature of from 0 to 80°C.

Appropriate Office for Opposition Proceedings (Rule 4 Patent Rule 1972), Patent Office, Calcutta.

2 Claims

A process for the preparation of polymer of propylene having total melt index values (MIL) 2 g/10 min, total intrinsic viscosity [n] values in tetrahydronaphthalene at 135°C 2.8 dl/g, molecular weigt distribution (Mw/Mn) values> 20 and a content of fraction insoluble in xylene at 25C> 94; said process comprises the polymerization of propylene in the presence of a catalyst, obained in a known method by contacting:

(a) a solid catalyst component comprising 4.-titanium compound having at least one titanium-halogen bond, and an electron-donor compound, both supported on a magnesium dihaide in active form;

(b) an Al-alkyl compound;

(c) an external electron-donor compound selective from the silanes containing at least . one cyclopentyl group bonded to the silicon, and one or more-OR groups, also bonded to the silicon atom, where R is a C_1-C_{13} alkyl, C_3-C_{18} cycloalkyl, C_3-C_{18} aryl, or C_7C_{16} aralkyl radical;

in gas phaso at a temperature ranging from 20 to 100-C and in at least two stages followed for preparing from 10 to 60 wt % of a fraction (A) of the polymer and from 40 to 90 wt % of a fraction (B), of the polymer in separate and consecutive stages, and reacting in each stage the said polymer with the catalyst coming from the preceding stage, the said fraction (A) of the polymer having [n] >; 2.6 and the said fraction (B) of the polymer having [N] < 1.2 and MIL >50.

Int. Cl.[4] : D 06 P 3/00. 3/04, 3/30, 3/32.

A METHOD OF APPLYING DYE TO KERATIN FIBRES.

Applicant : COMMONWEALTH SCIENTIFIC AND INDUSTRIAL RESEARCH ORGAN1SATION, OF LIMESTONE AVENUE CAMBELL AUSTRALIAN CAPITAL TERRITORY, 2601, AUSTRALIA

Inventor : (1) JOHN ANTHONY RIPPON
(2) FRANCIS JAMES HARRIGAN.

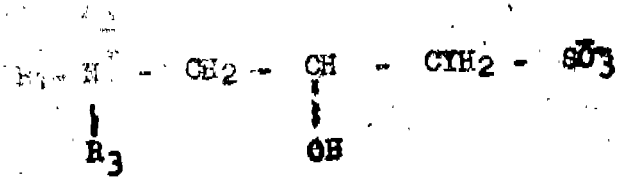
Application No. 62/Cal/1993 filed on 2nd February, 1993.

(Convention No. PL-0673/92 on 4-2-92 and PL-5373/92 on 15-10-92 in Australia).

Appropriate Office for Opposition Proceedings (Rule 4 Patent Rule 1972), Patent Office, Calcutta-

21 Claims

A method of applying dye to keratin fibres comprising pretreating the fibres by contacting them with a bath liquor comprising an alkaline solution of an amphoienc suifactant, and thereafter adding dye to the bath liquor and applying the dye to the fibres from said bath liquor wherein said amphoteric sunactant comprises an alkoxylaed hydroxysulphobetaine of the general structure :



where ;

Ri ,is a hydrocarbon group selected from the range $C_{12}H_{25}$ upto C_{21} H_{43}; and

R_2 and R_3 are poly (alkylene oxide) groups, each having n alkylene oxide units, where $3 < n < 21$;

wherein said bath liquor is substantially deficient of any surfactant-type levelling agents other than alkoxylated hydrosulphobetaine of said general structure; and

wherein said bath liquor is a single bath liquor which is initially alkaline solution for said pretreating step and then is converted to a dyeing solution for the dye appling step by said adding of dye to the bath liquor.

AN IMPROVED STAINLESS STEEL CONVEYOR BELT SYSTEM TOR CTC MACHINE.

Applicant STEELSWORTH LIMITED, OF TINSUKIA 786 125 ASSAM, INDIA.

Inventor : MANGALORE, PRABUAKAR PRABHU.

Application. No. 126/Cal /1993 filed on 2nd March 1993.

(Complete Specification left after provisional on 29-11-1994).

Appropriate Office for Opposition Proceedings (Rule 4 Patent Rule 1972). Patent Office, Calcutta.

9 Claims

An improved stainless steel conveyor belt system for CTC machine comprising one or more stainless steel sheets of desired size, longitudinal ends of said stainless steel sheet being joined in a known manner to the corresponding ends of same or adjacent sheets so at. to form an endless conveyor belt (a) characterized in that said conveyor belt being provided with multiple V-rope guides (b) attached to inner side thereof, said system comprises drive and driven shaft (d) assemblies, said shaft (d) asemblies being supported on bearings which are located within their respective housings (e) and are firmly bolted to said CTC machine frame, said bearing housings (e) or said driven shaft (d) assembly being provided with belt tensioning devices (1) and at least (wo idlera (k) being adapted to prevent sagging of the couveyor bolt.

Application No. 224/Cal/1993 filed on 19th April, 1993.

Appropriate Other for Opposition Proceedings (Rule 4, Patent Rule 1972) Patent Office Calcutta.

8Claims

wt. of aluminous material and 28 to 45 parts by wt, of additives and glass powder and wherin said aluminous material is made of fireclay grog calcined bauxite raw kyanite and technical alumina and the additives are made of deflocculating asent plasticizing agent,- as well as 'materials which help in the sintering and sticking properties as well as layer-forming properties for the gunned material having the following process step :

(a) technical alumina said the different additives arc dry ground to a very fine size of -325 mesh tyler screen;

(b) to the above first stage finely ground material the fireclay grog is added and the dry tnix is ground again;

(c) in the third stage, culciaed bauxite and raw kyanite are added and dry mixed thoroughly;

(d) and in the fourth stage, the required quantity of glass powder is added and is throughly dry mixed;

(e) finally to the fourth stage aluminosilicate dey mix required water is added and mixed thoroughly to prepare the semidry gunning mass.

METHOD AND APPARATUS FOR MANUFACTURING A BRAZED METAL HONEY COMB BODY.

Applicant :. EMITEC GHSELLSCHAFT FOR EMISSION-STECHNOLOGIE MBH OF HAUPTSTRASSE 150 W-5204 LOHMAR 1 BUNDESREP. DEUTSCHLAND. GERMANY.

Inventor : WIERES LUDWIG.

Application No. 299/Cal/1993 filed on 31ST May, 1993.

Appropriate Office for Opposition Proceedings (Rule 4, Patent Rule 1972). Patent Office, Calcutta.

18 Claims

A method for manufacturing a brazed metal honeycomb body (1), which for instance is of metal and which is wound, stratified, or intervened from sheet metal layers at feat some of which are structured (,2, 3) and is to be brazed at least in partial regions (5, 6) having the following steps :

(a) at least the structured sheet-metal layers (2) are provided with a thin film of a rolling oil (4), if such a film is net already present from the production process;

(b) the rolling oil film (4) is heat treated to remove highly volatile components by hot air or inter

(c) providing a brazing material into the contact regions (5, 6) of the sheet-metal layers (2, 3) with on aqueous solution of a surfactant;

(d) the honeycomb bodies (1) produced from the sheet-metel layers put into contact with known powdered brazing material, which adherse to the points where rolling oil residues and the surfactant have come together.

Appropriate Office for Opposition Proceedings; (Rule 4. Patents Rule,. 1972)Patent, Office. Calcutta.

11 Clamis.

An apparatus for treatment of solid material comprising

(a) a conveyor belt (19) at least a portion of which travels within a housing (16) :

(b) means (23) for calculating gas through the housing;

(c) wherein, inside the housing, the conveyor belt follows a spiral path for at least a portion of its length, the conveyor bolt comprising a plurality of conveyor links (24) and a plurality of bottom members (28), such that the conveyer belt forms ai conveyor stack, (20) of superimposed conveyor belt tiers in the shape of a bollow cylinder having a perforated inner wall and a perferated outer wall.

(d) an inner partition on (21) positioned in the centre of the hollow cylidner, such that the inper partition is adapted to obstruct the flow of gas down the inside of the cylinder '

(e) an outer partition (22) positioned between the perforated outer wall of the hollow cylinder and the housing (16) such that the outer partition is adapted to obstruct the flow of gas down outside of the hollow cylinder, such that the housing the inner partition the outer partition, and [he hollow cylinder form an upper chamber (32) and a lowwr chamber (33) ;

characterised by

(f) at least one additional chamber (36;. 38;40; 42; 43; 44, 43) extending axially along part of the height of the hollow cylinder and around the interior/exterior circumference of the hollow cylinder and having, an open side adjoining the perforated inner/outer was of the hollow cylinder formed by the conveyor stack; (20) of superimposed conveyor belt tiers, whereby the inner partition (21), the outer partition (22) said at least one additional chamber (36; 38; 40; 42; 43; 44; 45) direct the flow of gas through the convenor stack of conveyor belt tiers as the circulatating means (23) circulates gas through the housing.

RESTORATION PROCEEDINGS

Notice is hereby given that an application was made under Section 60 of the Patents Act, 1970 for the restoration of Patent No. 174421 granted to. INDIAN OIL, CORPORATION LTD., for an invention relating to preparation of crystalline nay zeolite.

The patent ceased on the 24th. Sept. 1996 due to non-payment of renewal fees within the prescribed time and the cessationof the patent was notified 10 the Gazette of India, Part III, Section 2 dated the 20th September 1997.

Any interested person may give notice of opposition to the restoration by leaving a notice on Form 32 in duplicate, with the Controller of Patents, The Patent Office. Nizam Palace, 2nd M.S.O. Building, 5th, 6th & 7th Floor, 234/4, Achayra Jagadish Bose Road, Calcutta-700 020 on or before 27-11-97 under Rule 69 of the Patents Rules, 1972. A. Written Statement, in triplicate witting out the nature if the opponents interest, the facts upon which he bases his case and the relief he. seeks, shall be filed with the notice or within one. month from the date of the notice.

Notice is hereby given that an application was made under Section 60 of the Patents Act, 1970 for the restoration of Patent No. 175260 granted to SHRIRANG WAMAN DESH PANDE for an invention related to AN IMPROVED TOOTH BRUSH.

The patent ceased in the 14th July, 1996 due to non payment of renewal fees within the prescribed time and the cessation of the patent was notified in the Gazette of India, Part III. Section 2 dated the 20th September, 1997.

Any interested parson may give notice of opposition to the restoration by leaving a notice on Form 32 in duplicate, with the Controller of Patents. The Patent Office, Nizam Palace 2nd M.S.O. Building, 5th, 6th & 7th Floor, 234/4, Achayra Jagadish Bose Road, Calcutta-760 020 on or before 27-11-97 under Rule 69 of the Patents Rules, 1972. A Written Statement, in triplicate setting out the nature if the opponents interest, the facts upon which he base* his case and the relief he seeks, shall be filed with the notice or within one month from the date of the notice.

'Notice is hereby given that an application was made under Section 60 of the Patents Act, 1970 for the restoration. 'I of Patent No. 175989 granted to BERND HANSEN for an invention relating to AN EXTRUSION HEAD APPARATUS FOR PRODUCINg TUBE.

The patent ceased on the 22nd October 1996 due to non-payment of renewal fees within the prescribed time and the cessation of the patent was notified in the Gazette of India. Part III, Section 2 doled the 20th September. 1997.

Any interested person may give notice of opposition to the restoration by leaving a notice on Firm 32 in duplicate, with the Controller of Patents, The Patent Office, Nizam Palace, 2nd M.S.O. Building, 5th, 6th & 7th Floor, 234/4, Achayra Jagadish Bose Road, Calcutta-700 020 on or before 27-11-97 under Rule 60 of the Patents Rules, 1972. A Written Statement, in triplicate yetting out the nature if the opponents interest, the facts upon which he base his case and the relief he seeks, shall be filed with the notice or within one month from the date of the notice.

Notice is hereby given that an application was made under Section 60 of the Patents Act, 1970 for the restoration . Patent No. 176528 printed to NUCHEM PLASTICS LIMITED for an invention relating to a process for the manufac-

---

The patent ceased on the 22nd April, 1997 due to non-payment of renewal fees within the prescribed time and the cessation of the patent was notified in the Gazette of India Part III Section 2 dated the 20th September 1997.

Any interested person may give notice of opposition to the restoration by leaving a notice on Firm in duplicate with the Controller of Patents the patent Office Nizam Palace, 2nd M.S.O. Building, 5th, 6th & 7th Floor, 234/4, Achayra Jagadish Bose, Road, Culcutta-700 020 on or before 27-11-97 wider Rule 69 of the Patents Rules, 1972. A Written Statement in triplicate setting out the nature of the opponents interest, the facts upon which he bases his case and the relief ho seeks, shall be filed with the notice or within one month from, the date of the notice.

OPPOSITNON PROCEEDINGS UNDER SECTION 25

An opposition has been entered by KIRLOSKAR COPELAND LIMITED, Maharashtra in respect of the application for patent No. 177498 made by WHITE CONSOLIDATED INDUSTRIES, INO to the grant of a patent on said application.
